

# MOROCCO FIELD STUDIES GCSE, A-LEVEL, IB ... AND MORE

- Discover Ltd have been running field studies in Morocco since 1978
- Personalised itineraries • Teaching resources written for the new specifications • Prices from £398 (5 days, land only) per paying student

Have you considered running a trip to Morocco to support GCSE or A level?

*“From the bustling, colourful and aromatic souks to the vast, undulating rocky desert and the majestic snow-capped peaks, Morocco is a geographer’s paradise. These contrasting environments offer a huge range of opportunities for field studies and individual investigations.”*

SIMON ROSS, GEOGRAPHY AUTHOR

## CITIES (Marrakech)

- Marrakech as an example of a city in an NEE; social, economic and environmental challenges
- Impacts of tourism on economic development
- Transport issues and management
- Issues associated with urban sustainable development including water management
- Marrakech: sense of place
- Urban change and regeneration

## DESERTS

- Weathering and mass movement processes
- Role of wind and water processes
- Hot desert landforms
- Water management
- Social & environmental impacts of economic development
- Desertification
- Hot desert ecosystems; plant and animal adaptations

## COASTS (Essaouira)

- Coastal processes and landforms
- Coastal management
- Sediment sources, cells and budgets
- Environmental impacts of economic coastal tourism developments

## MOUNTAINS (Imlil and Atlas Mountains)

- Imlil flash flood (1995)
- Slope processes and weathering in mountainous environments
- Impacts of tourism on economic development
- Aspects of water and carbon cycles
- Rural settlement development
- Aspects of food, water and energy security

*“Just Wow! What an absolutely incredible, magical journey we have had in Morocco. In all, this ranks as one of the very best trips I’ve experienced and I would thoroughly recommend Discover Ltd to others.”*

JON-PAUL DAVIES, GEOGRAPHY DEPARTMENT, D’OVERBROECK’S

# Morocco offers excellent opportunities for studying relevant and appropriate aspects of new GCSE and AS/A Level specifications

## POSSIBLE 5 DAY/4 NIGHTS ITINERARY FROM £398 (DEPENDING ON FLIGHT TIMINGS)

### Day 1

- Arrive Marrakech
- Familiarisation of central Marrakech, with a walking tour of the Medina and Jemma el-Fnaa
- Reflections of urban processes in a new emerging economy (NEE)
- Overnight in Marrakech

### Day 2

- Day in Marrakech investigating urban issues including sustainability, redevelopment, resource management, transport and economic development
- Possible visits to include the tanneries, water museum and botanical gardens
- Travel to the Agafay desert for an evening camel ride and overnight camping under the stars

### Day 3

- Consideration of hot desert environmental issues, including ecosystems, plant and animal adaptations, development opportunities and challenges, water management
- Travel to Imlil via the reservoir Lalla Takerkoust to further consider water management
- Arrive Imlil in the foothills of the High Atlas mountains for two night's accommodation

### Day 4

Option might include:

- Trek into Imlil valley to consider aspects of rural life in an NEE including development issues, water and waste management and the impacts of tourism
- Investigate aspects of the water cycle and carbon cycle, possibly including NEA consideration and field work skills practice
- Investigate the recent changes that have taken place in Imlil as a result of the growth in tourism

### Day 5

- Further investigations in Imlil (*see above*)
- Visit the National Park museum to consider ecosystems, plant and animal adaptations and management issues
- Visit modern development/redevelopment on the outskirts of Marrakech (new housing development, shopping mall, hotel complex)

*Extensions are available to the Sahara Desert and to the coastal resort of Essaouira*
